## 4net Mobile Business

4net's mobile solution provides organisations with the ideal opportunity to integrate fixed and mobile estates.

Because we understand the challenges facing businesses today we have committed to delivering mobile solutions and tariffs that will help you to meet these challenges.

We know for example that we need to deliver our mobile solutions on the back of an extensive and reliable network, which is why we have chosen Vodafone's world-class network to support our world class service.

Our mobile solution enables your companies to cost effectively integrate mobile and fixed line telephony, meaning that your users can have seamless, effective communications no matter where they are.

Changes in the way we work have provided business with the opportunity to exploit the technology and knowledge of their workforce to enable flexibility, efficiency and mobility within their business. Companies that want to stay ahead of their competitors will need to accept the new technology that will allow them to perform more effectively and efficiently.

Many companies are adopting flexible working strategies that allow employees to work from anywhere using their device of choice with the same access to information as they have in the office.

---

## Benefits of 4net's Mobile Solutions

### Enables flexible working.

Our Mobile proposition allows your users to access everything they need to perform their job no matter where they are. Our BlackBerry and other email services allow access to email calendar and tasks on the move. Industry leading 3G-network coverage and speeds mean that the Internet and your company LAN are only a few seconds away from your users.

By subscribing to our mobile and fixed line offers you will receive our market leading on-net rates, enabling you to link your fixed and mobile estates together to give you true flexibility in your users working environment. 4net can deliver fixed mobile integration at a cost effective price point, giving your business a strong return on investment.

### Keeps you connected.

Our network covers 99.7% of the U.K. population and 88% of the U.K. landmass so that you will always be in the best position to make and receive a call in the U.K. And for users that travel abroad for business we have roaming agreements in over 200 countries and 550 networks.

### Keep your number.

It is easy to port your existing number or take out a new one.

**Stay in contact:** You need never miss an email when you are on the move - no matter which mobile platform you choose we have an email package to suit your requirements. Our extensive range of support packages will help you get the most out of your investment.

**Lower overall costs:** We have a range of tariffs to suit all user profiles. You can choose from a range of bundle minute packages or our simple Pay As You Use tariff. These tariffs are backed up by our preferential fixed to mobile and mobile to fixed on-net rates.

**Business continuity:** Unexpected events, adverse weather and traffic conditions need no longer disrupt your business as our mobile offering easily integrates with your fixed line infrastructure and you will be able to receive all calls on your mobile should such an event occur.

**One simple bill for fixed and mobile estates:** Our managed and cloud services can wrap your fixed line, data services and telephony maintenance into one consolidate bill – helping you to manage your costs whilst improving employee flexibility and productivity.

## Bundled Voice Tariffs

### Managing your monthly cost is easy with 4net's Bundled Voice Tariffs

Managing monthly cost is important but can be tricky, particularly when it comes to monthly variable costs such as mobile spend.

Our bundle minute packages help you manage your cost as they are specially designed to give a stable monthly charge, as well as the flexibility you need as your fleet size changes.

### Our bundle packages include all you would expect:

Calls to own mobile numbers, calls to national numbers, text messages and calls to the 4Net network.

### Improve flexibility

We won't limit you to a set number of connections per bundle. We will give you a bundle package that meets your minute requirements - not one dictated by the amount of connections you have in your fleet.

In addition we have a unique on-net bundle of minutes allocated to each user. These provide free intra company calls even to one of your mobiles, making Fixed/Mobile convergence a reality.

We also offer a range of bolt-on options which help you manage SMS and Data, including BlackBerry in a controlled manner.

Take advantage of our unique Bundle Packages to reduce your intra company spend and take control over your monthly mobile spend.

### Benefits

- **Stable monthly mobile invoice** - Take control over your mobile spend
- **Packages to suit usage, not fleet size** - We have no minimum or maximum connection requirements on our bundles
- **Reduce costs** - using our unique on-net minute bundle
